Subject: construction concern of a new Church

Message submitted from the <City of Ankeny> website.

Site Visitor Name: Myron Green
Site Visitor Email: riverrat406@msn.com

I am writing to you after we discussed the construction of a new Church at NE47th and Ankeny blvd. I have heard that a new Church will be built at this site and I was told it will be of brick extending up approx. 3' and then steel siding the rest of the way up the exterior. I believe this exterior should be of brick the whole way up to the roof line that is seen by either street so that it exceeds the minimum standards and more conforms to other Churches that have been built in recent years. Most are being built of pre cast concrete and have a modern look. If you drive around town and look at other Church sites you will soon discover this is a prime site and should be built to higher standards and make the neighborhood a much more inviting area. This site should have the most beautiful Church in town and not something that looked like the Church I went to as a child.

Thank you
Myron Green
