**Subject:** Request to the city council

Hello,

I have a request for the city council. I would like for the city to allow adult soccer leagues to paint lines at Cresbrook Park to create one field to play soccer games.

I live right there and I think the space is great to play soccer.

Parks and recreations have informed me that currently the space is available first come first serve, goals can be put there temporarily for games, they have to be removed the same day. But painting lines to create the field is not allowed.

Currently the city hasn't any soccer field available for adult games either for free or for rent and I think with the popularity of the sport and the big number of adults playing this adult leagues this should change. I am in the board of the International soccer league and we alone have 1000 players.

Could you let me know how can I address the city council to make this request? Or what should be the correct way to make this request to the city?

Thanks.
